

LAF Dry Bulk Liner

Dry Bulk Liner

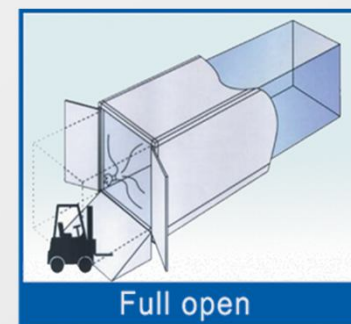

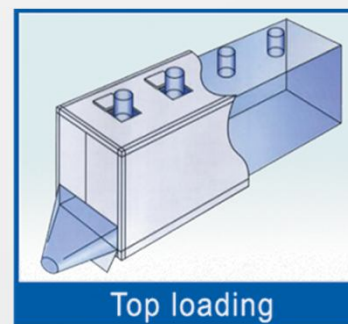

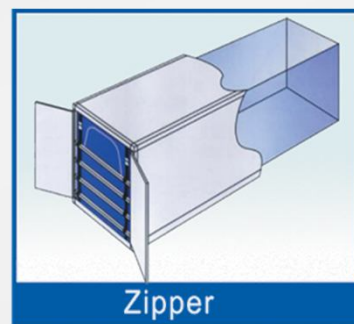

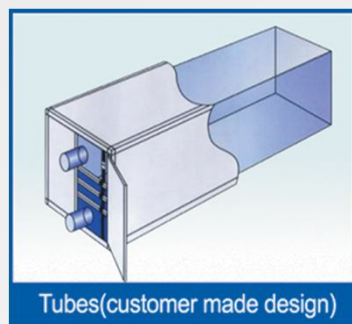

Dry Bulk Liner, which is also called as Container liner, is widely used for 20ft/ 30ft/ 40ft ISO containers, suitable for bulk free-flowing granules and powders.

Dry Bulk Liner is made from food-grade materials to keep the goods dry and hygienic during transportation. Compared with traditional small bags, it is much more efficient in loading/unloading which helps saving packaging and labor expense as well as logistics cost comprehensively.

Customized Dry Bulk Liner

Customized Dry Bulk Liner is usually provided according to specific cargo features, loading machine in suppliers' factory as well as unloading machine in cargo receivers' facilities.
